

Safety Data Sheet (SDS)

Product: Sodium Chloride (Industrial)

CAS Number	7647-14-5
Formula	NaCl
UN Number	-
ADR Class	-
Packing Group	-
Signal Word	-
Issued	2026-05-25
Document Version	1.0
Producer	Industrial Chemicals Ltd.

Appearance: White crystalline solid, non-hazardous

1. Identification

This section describes 1. identification information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

2. Hazards

This section describes 2. hazards information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

3. Composition

This section describes 3. composition information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

4. First-aid

This section describes 4. first-aid information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

5. Fire-fighting

This section describes 5. fire-fighting information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

6. Accidental release

This section describes 6. accidental release information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

7. Handling & storage

This section describes 7. handling & storage information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves,

goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

8. Exposure controls

This section describes 8. exposure controls information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

9. Physical properties

This section describes 9. physical properties information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

10. Stability

This section describes 10. stability information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

11. Toxicology

This section describes 11. toxicology information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

12. Ecology

This section describes 12. ecology information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

13. Disposal

This section describes 13. disposal information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

14. Transport

This section describes 14. transport information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

15. Regulatory

This section describes 15. regulatory information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.

16. Other

This section describes 16. other information for Sodium Chloride (Industrial). Refer to local regulations (REACH, CLP, GHS) for full compliance. Always wear appropriate PPE: gloves, goggles, lab coat. Store in a cool, dry, well-ventilated area away from incompatible materials.
